Picasso Institute

We are a family that is passionate about art, publishing it and transferring it from being a luxury, to works of art that are at the core of life and form its patterns and are inseparable from it. Picasso institute, has a new creative vision to reformulate the social beliefs about learning and creativity. We are keen on providing high quality vocational training and determined to boost the Jordanian and the Arab Market with the best graduates who will change the world colors. . Our specializations, training diplomas, are unique, elite and help visualize and create your own future. At Picasso institute, you have to start off with your imagination, we provide you with the means that make this imagination a reality. The tools and the information provided by Picasso professionals emboss an inscription on your hands. As the great artist Pablo Picasso said " Everyone is born an artist", we have to protect the artist that lies in you and create tangible art.

Founded in 2014 in Jordan

Course Overview

The Spatial Design course in Interior Design introduces students to the art and science of arranging and optimizing spaces. Focusing on both function and aesthetics, the course teaches students how to create environments that are visually engaging, practical, and user-centered. Through principles of space planning, ergonomic design, and sustainable practices, students learn to craft layouts that enhance the experience and flow of any interior. This hands-on course combines theory with digital modeling techniques, empowering students to envision, design, and refine spaces that cater to both personal and professional needs.

Course Content

- A simple plan will be defined with an area ranging from 70-90 m², where students will work on applying multiple functions within the same space. The course will start by designing the space as a residential area, then it will be transformed into a commercial space, and finally into a tourist space. Throughout this process, students will learn general skills in residential, commercial, and tourist design, as well as landscape design, focusing on the fundamental principles of design and partitioning techniques.
- Students will also become familiar with the basic rules related to interior design, such as color selection, lighting distribution, and furniture arrangement. The skills they have acquired from courses in interior design, freehand sketching, AutoCAD, and 3D Max will be utilized to develop their ideas and turn them into actual designs.
- The course will include practical workshops that allow students to implement their projects hands-on, enhancing their skills in creativity and critical thinking. At the end of the course, students will present a graduation project that reflects integrated and innovative designs, expressing their artistic vision and ability to blend different functions within the designed spaces.
- The idea behind working with a single design space and creating multiple designs is to enhance students' design abilities and vision, allowing them to think about the same space in different ways and approaches.

Course Delivery Method

Classroom

Learning Outcomes

By the end of this course, students will be able to:

- Gain a comprehensive understanding of spatial theory, including the fundamental principles of proportion, scale, balance, and flow within a three-dimensional environment.
- Learn how to apply functional design concepts to create spaces that meet specific requirements, focusing on human-centered design to enhance comfort, accessibility, and usability.
- Develop spatial awareness, learning to visualize and manipulate three-dimensional space and effectively translate ideas into spatial configurations.
- Improve their problem-solving skills, learning to address challenges in spatial layout, circulation, and zoning within various types of spaces.
- Learn how to balance aesthetic considerations with practical constraints, such as structural elements, materials, lighting, and furnishings, to achieve a cohesive design.
- Explore sustainability concepts, including adaptive reuse, material selection, and energy efficiency, applying these principles to create environmentally responsible spatial designs.

Requirements for Successfully Passing the Course

- Commitment to attend the training course and not to exceed the permitted absence rate, which is 15% of the number of hours for the training course.
- Submission of the course project.

Who Can Join

At Picasso institute, anyone can join, regardless of their background or experience. Whether you're a beginner or have some prior knowledge, you are welcome to explore and develop your creativity with us. No previous experience is required.

Minimum Age to Join

At Picasso institute, anyone 16 and older can join.

Course Language

At Picasso Institute, the course is structured as follows

- Presentations and course materials are provided in English.
- The explanation and instruction are delivered in Arabic.

Privileges for Students at Picasso Institute

- Visits from the institute to enhance their experience.
- Full access to all institute facilities.
- Opportunities for one-on-one consultations with experts in various fields.
- Participation in many hands-on workshops.
- Exclusive networking events with industry professionals.
- Access to special exhibitions and guest lectures.
- Personalized mentorship to help guide creative projects.
- Opportunities to showcase student work in school-organized exhibitions.

At Picasso Institute, we believe that every artist has a unique story to tell and limitless potential to unlock. As you begin this creative journey with us, know that you are not just a student but an integral part of a community that celebrates imagination, passion, and innovation. We are here to support and guide you every step of the way. Stay curious, embrace challenges, and let your creativity shine. We can't wait to see the extraordinary work you will create!

Welcome to the Picasso Institute family!
